This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional):

I strongly recommend that Botium Toys strengthen its information security program by focusing on both preventive and corrective controls.

Key improvement areas include:

- Implementing the principle of least privilege to ensure employees only have access to the systems and data necessary for their roles.
- Improving password security, including stronger password policies and the adoption of a centralized password management system.
- Developing and maintaining disaster recovery and business continuity plans to ensure operational resilience and faster recovery in the event of security incidents or system failures.
- Enhancing overall security monitoring and control maturity, especially in areas related to risk mitigation and incident response.

These actions would help reduce security risks, improve compliance readiness, and strengthen the organization's overall security posture.
