Ticket comments
Investigated phishing alert A-2703. Email contains a suspicious attachment (bfsvc.exe) and social engineering indicators (password included in email, spelling errors, suspicious sender address and IP). Verified the attachment hash (54e6ea47eb04634d3e87fd7787e2136ccfbcc80ade34f246a12cf93bab527f6b) as known malicious using threat intelligence sources. Based on the phishing playbook, the attachment is confirmed malicious. Ticket status updated to Escalated and forwarded to Tier 2 SOC for containment and remediation actions.

Additional information
